Client: Cairns Solutions, USA

Education

Chicago State University, IL Dec - 2017

Master of Science, Computer Science, GPA: 3.82/4.0

Andhra University, Visakhapatnam, April-2013

Master of Computer Application, CGPA: 7.79/10.0

Projects

NextForms

Next Forms is a next-generation form builder. I started this as a school project but got very much interested in it in to build it as a service. This is still in Alpha.2. But planning to release v1.0 soon.

Techumber

I have created Techumber 5 years back. It started as a small blog powered by blogger today it has more than 100k unique visitors every month. I write about different technical posts which I'm really passionate about.

JobsPlane

Jobsplane is one my earlier startup. I have been associated with Jobsplane for more than 6 years. Now, Jobsplane is one of the best jobs board in India. It has more than 1M visitors every month.

Angular2-markdown

I created this angular(ngx) module which converts markdown to html on fly. It got a very good attention from angular community. If you google markdown solution for Angular X you will get this package on first page. It has more than 15k downloads per month on npmjs.org.
